

Refurbished Market has Opened

Tuesday, 24 January 2012 11:28 - Last Updated Tuesday, 24 January 2012 12:15

We announce proudly to have opened our refurbished market.

In the past years computing capacity evolved faster than the average need for every day office activity, therefore even newer PC, laptop models are sometimes equipped with less powerful CPUs that you actually can get in a refurbished PC for almost 50% less, compared to a similar new model. Recognizing this we started a refurbished market, where you can search for PCs, laptops and servers. As the availability of these devices is constantly changing we suggest to request a call back on the form, or [contact](#) us to check availability first.

Most of these devices are coming with 6 months guarantee, but some models have 1 year guarantee, that makes your decision likely even easier to choose a strong refurbished PC instead of a brand new with same or similar specifications.

And the best on the top of all these good news, that we can provide preinstalled Windows 7 Pro, Home Premium and XP Pro operating system and Office 2007 Standard softwares, fully legally almost 70% less than what it would cost with your new PC.

Are you astonished or simply just curious? Request us to call you back or simply [contact](#) us!
